**Biotechnology High Performance Computing
Software Applications Institute
Frederick, MD, USA**

Job Opening: Scientist

We are looking for a dynamic scientist to join the U.S. Army Medical Research and Materiel Command's Biotechnology High Performance Computing Software Applications Institute (BHSAI). This position is for research scientists interested in working in an interdisciplinary environment with focus on the development and application of computational solutions to biomedical problems, involving signal processing of time series physiological data, data mining, data-driven and physiological-based models, and artificial intelligence. The candidate must have a Ph.D. in a related discipline and a strong publication record. The candidate is expected to simultaneously work on multiple projects, involving a diverse and interdisciplinary team of scientists across multiple laboratories. This position is located in Frederick, Maryland. A background requirement is that the employee must have lived in the U.S. three out of the last five years.

Please see current career opportunities at <https://bhsai.org> to apply with your full Curriculum Vitae to the Henry M. Jackson Foundation.
